

MANJUNATHAN RADHAKRISHNAN

AI Solutions Architect | Making Businesses AI Native

✉ manjunathan.ai02@gmail.com |  LinkedIn |  GitHub |  manjunathan.me

PROFESSIONAL IMPACT

Customer-facing AI solutions architect specializing in building production Agentic AI - RAG/search systems and workflow automations across enterprise environments. Skilled in identifying business opportunities for AI adoption. Architected scalable multimodal systems across cloud environments. Delivered measurable ROI for 17+ enterprise clients across **E-commerce, Insurance, Healthcare, Mortgage and Operations**.

EXPERIENCE

AI Research Architect, Antz AI – Hyderabad, India **July 2025 – Present**

- **Built and shipped Budhi AI** – a second-memory app with 1000+ downloads across iOS, Android, and Web – powered by Qdrant-backed multimodal ingestion, multi-tenant semantic search, and RAG-grounded summaries optimized using Ragas to achieve 92%+ retrieval precision and reduced hallucinations.
- **Built Planr AI** (antz.ai/manufacturing), a decision-intelligence platform connecting ERP/WMS data into shortage detection, ranked recommendations, what-if feasibility analysis, and action workflows across plants/SKUs. Led GTM efforts by creating product positioning, demo flows, conference collateral, and customer-facing narratives to drive enterprise conversations.
- **Partnered with product and domain stakeholders** to scope ambiguous workflows, convert them into agent architectures, and ship customer-ready pilots with compliant document intelligence and decision-support components.

ML Engineer, Mad Street Den (Vue.ai) – Chennai, India **June 2023 – June 2025**

- **Architected and managed ML lifecycle of multimodal AI solutions** serving 17+ Fortune 500 clients. Led technical discovery, solution design reviews, and production rollouts with measurable quality targets. Ensured PII masking and SOC2 compliance for enterprise LLM deployments
- **Built cloud-agnostic agentic workflows** coordinating LLMs, vision models, and microservices on Kubernetes clusters, integrated with Vector search (Chroma DB, Cosmos DB, Milvus) and RAG systems
- **Developed TrainConv framework** enabling distributed training with automated orchestration, reducing model deployment time by 60% and scaling inference services with Grafana/Elasticsearch monitoring

Machine Learning Intern, Drishti – Bangalore, India **March 2023 – June 2023**

- **Built large-scale action recognition models** for OEM workflows, replacing heuristic engines with data-driven temporal classification pipelines.

Research Intern, IIT Madras – Robert Bosch Centre **June 2022 – August 2022**

- **Developed vehicle trajectory extraction system** using YOLOv5 + SORT/DeepSORT, improving tracking accuracy to **80.5%**

STANDOUT PROJECTS

V-Commerce Studio – AI-native Commerce Agents	GKE Turns 10 Hackathon – APAC Winner	2025
DeepGait – Gait Abnormality Detection	Smart India Hackathon Winner	2022
GCN Pandemic Prediction – Graph ConvNets	IEEE Published	2022

SKILLS & COMPETENCIES

- **Generative & Multimodal AI/ML (Python):** LLMs, RAG systems, voice agents, document intelligence, NLP, CV, Pytorch
- **Data Engineering:** Vector databases (Qdrant/ChromaDB), Neo4j, API-driven pipelines, knowledge graphs
- **MLOps & Cloud Enablement:** Observability and Traceability, AWS, Azure, GCP, Kubernetes, MLFlow, Ray, CI/CD
- **AI Strategy & Consulting:** Need Assessment, Solution roadmapping, stakeholder engagement, ROI modeling, Responsible AI

EDUCATION & RECOGNITION

B.E. Electronics and Communication, SSN College of Engineering **2019 – 2023**

CGPA: 9.02/10 | Relevant Coursework: Machine Learning, Computer Architecture, Data Structures

Achievements: **1st Place** Smart India Hackathon 2022 (Govt. of India) • **Winner** MADHACK 2024 & 2023 • **IEEE** Publication (DOI: 10.1109/AISP53593.2022.9760527) • **President**, Association of Electronics Engineers • **ML Head**, Technical Club
